of a Medical Facility

PRESENTATION OUTLINE:

- A Introduction**
- B Global Health Expenditure**
- C Global Health Indicators**
- D Effective Health Expenditure**
- E Let's Raise Awareness**

INTRODUCTION

WHAT IS HAPPENING?

Effective resource utilization ***is key*** for healthier societies, but...

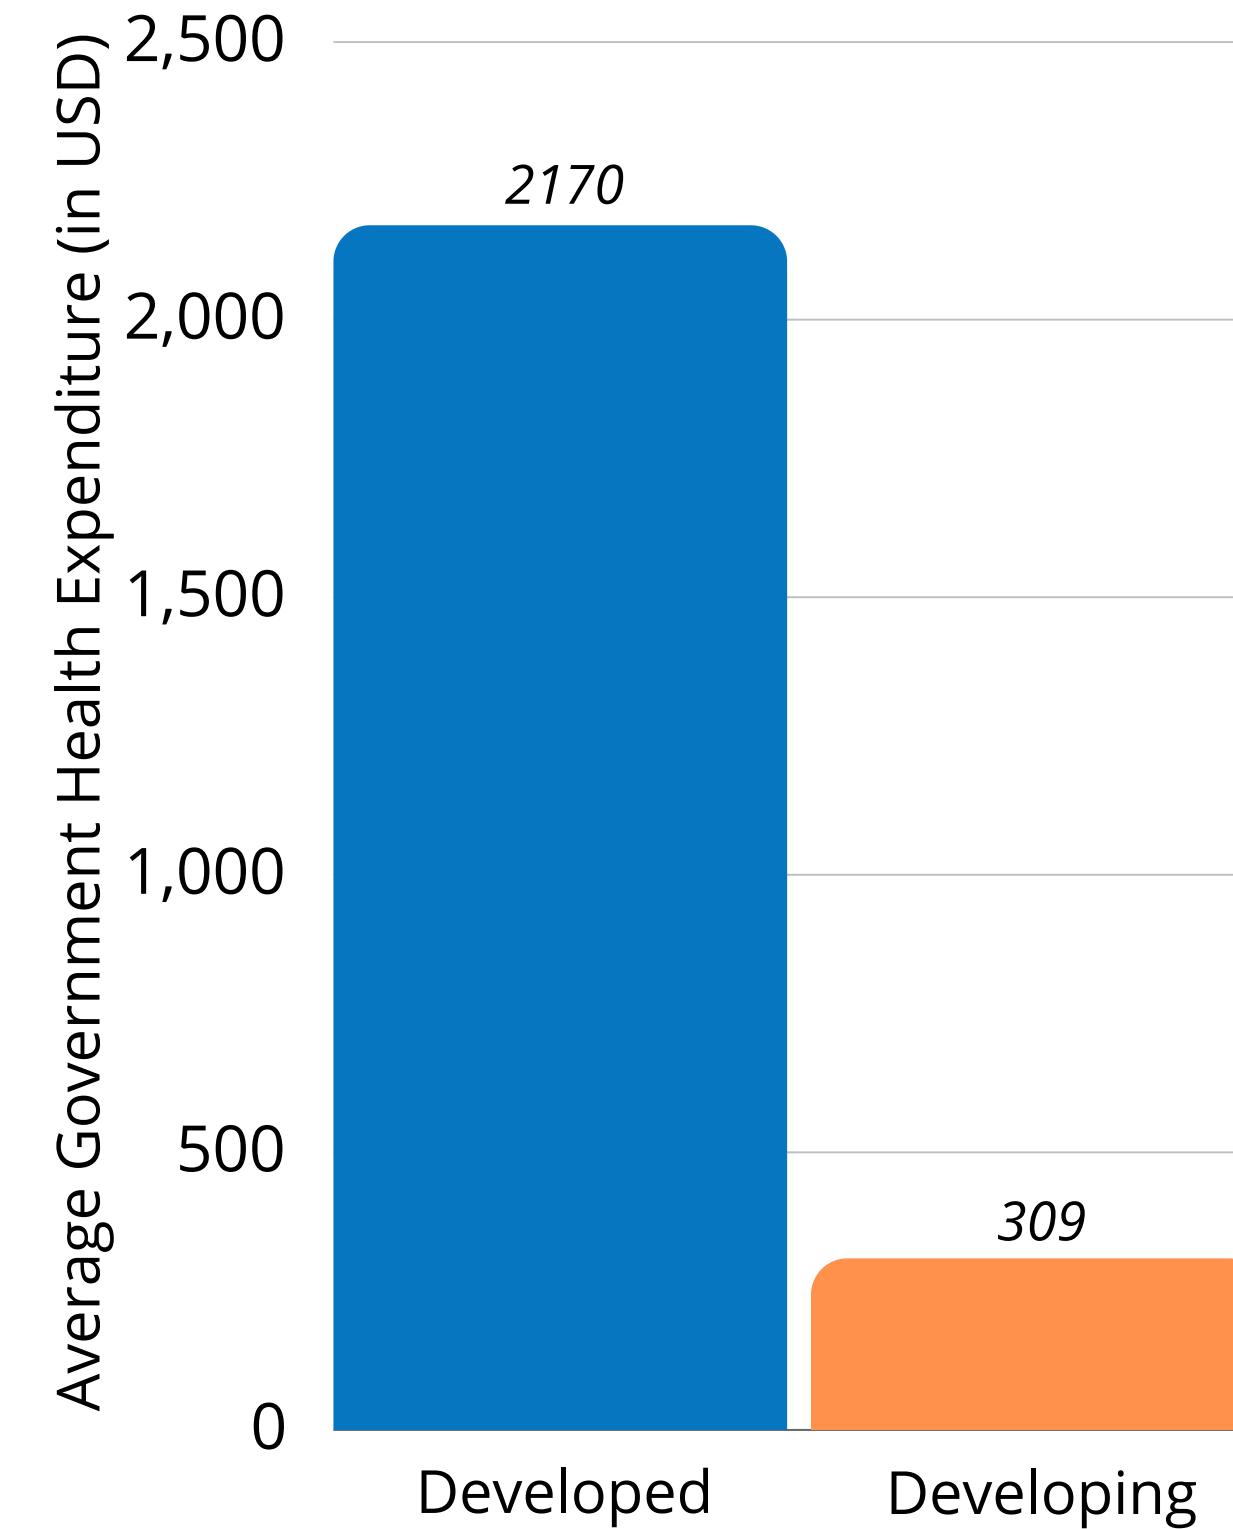

Some countries are **NOT** allocating these resources properly

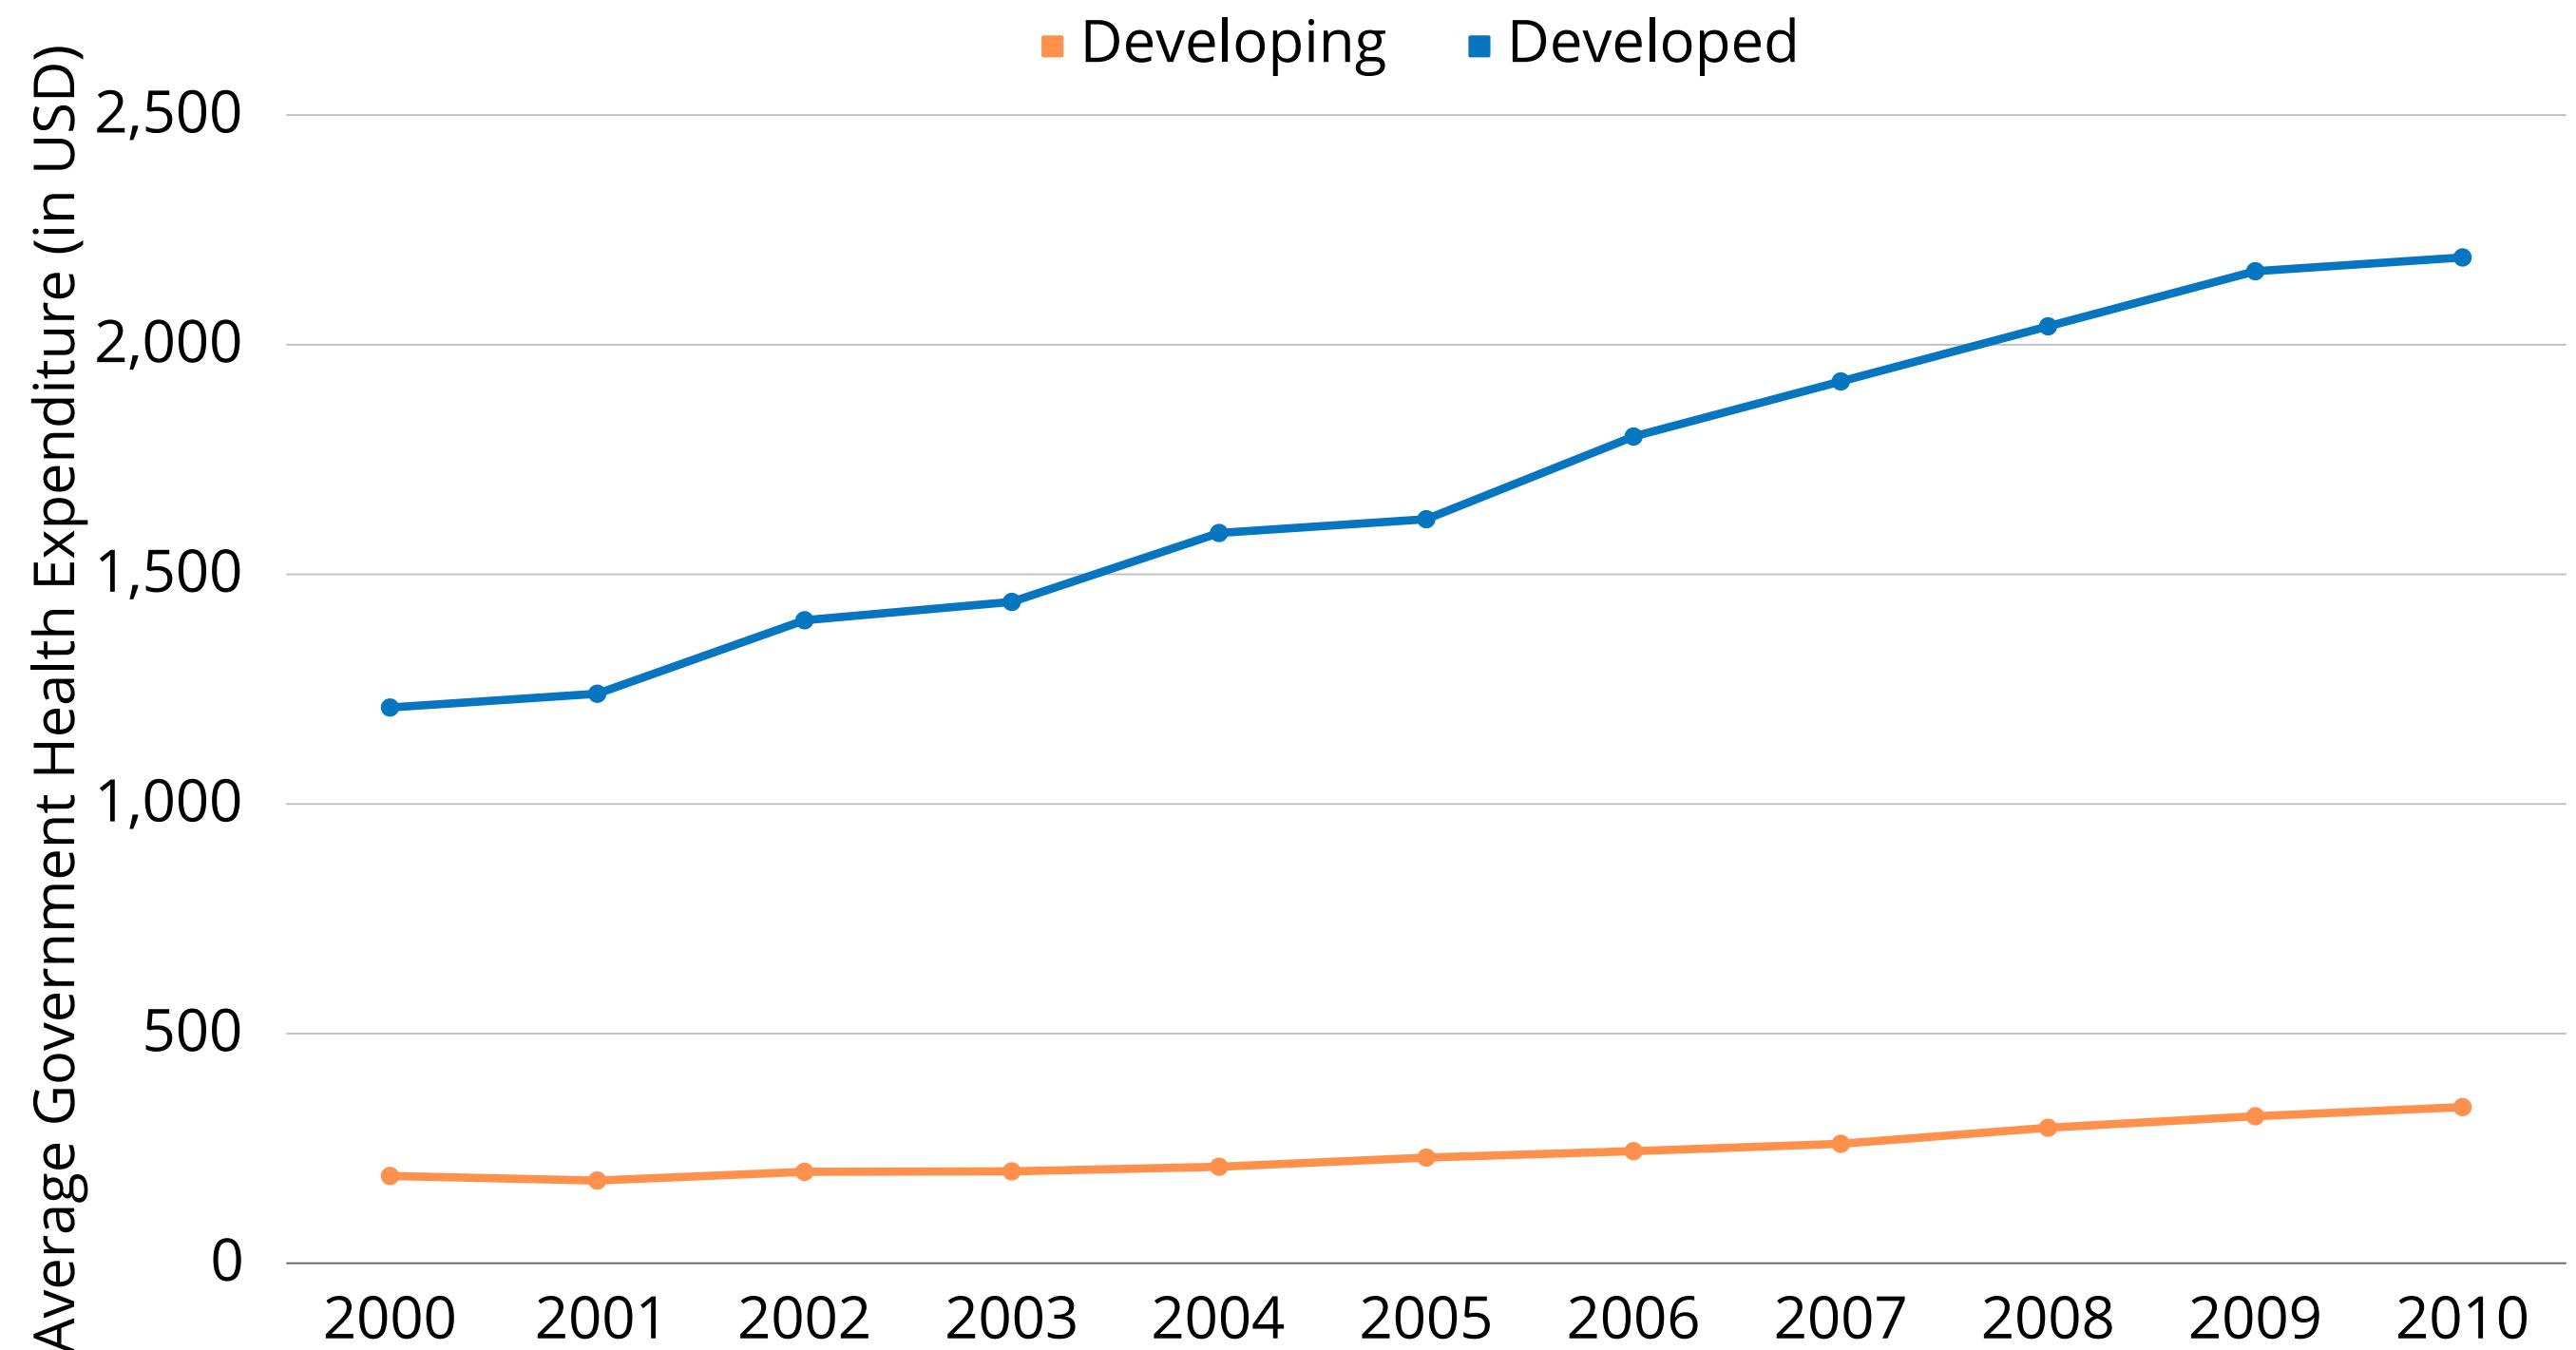

GLOBAL HEALTH EXPENDITURE

HEALTH EXPENDITURE

There's disparity between **developed** and **developing** countries

But also their tendencies over time

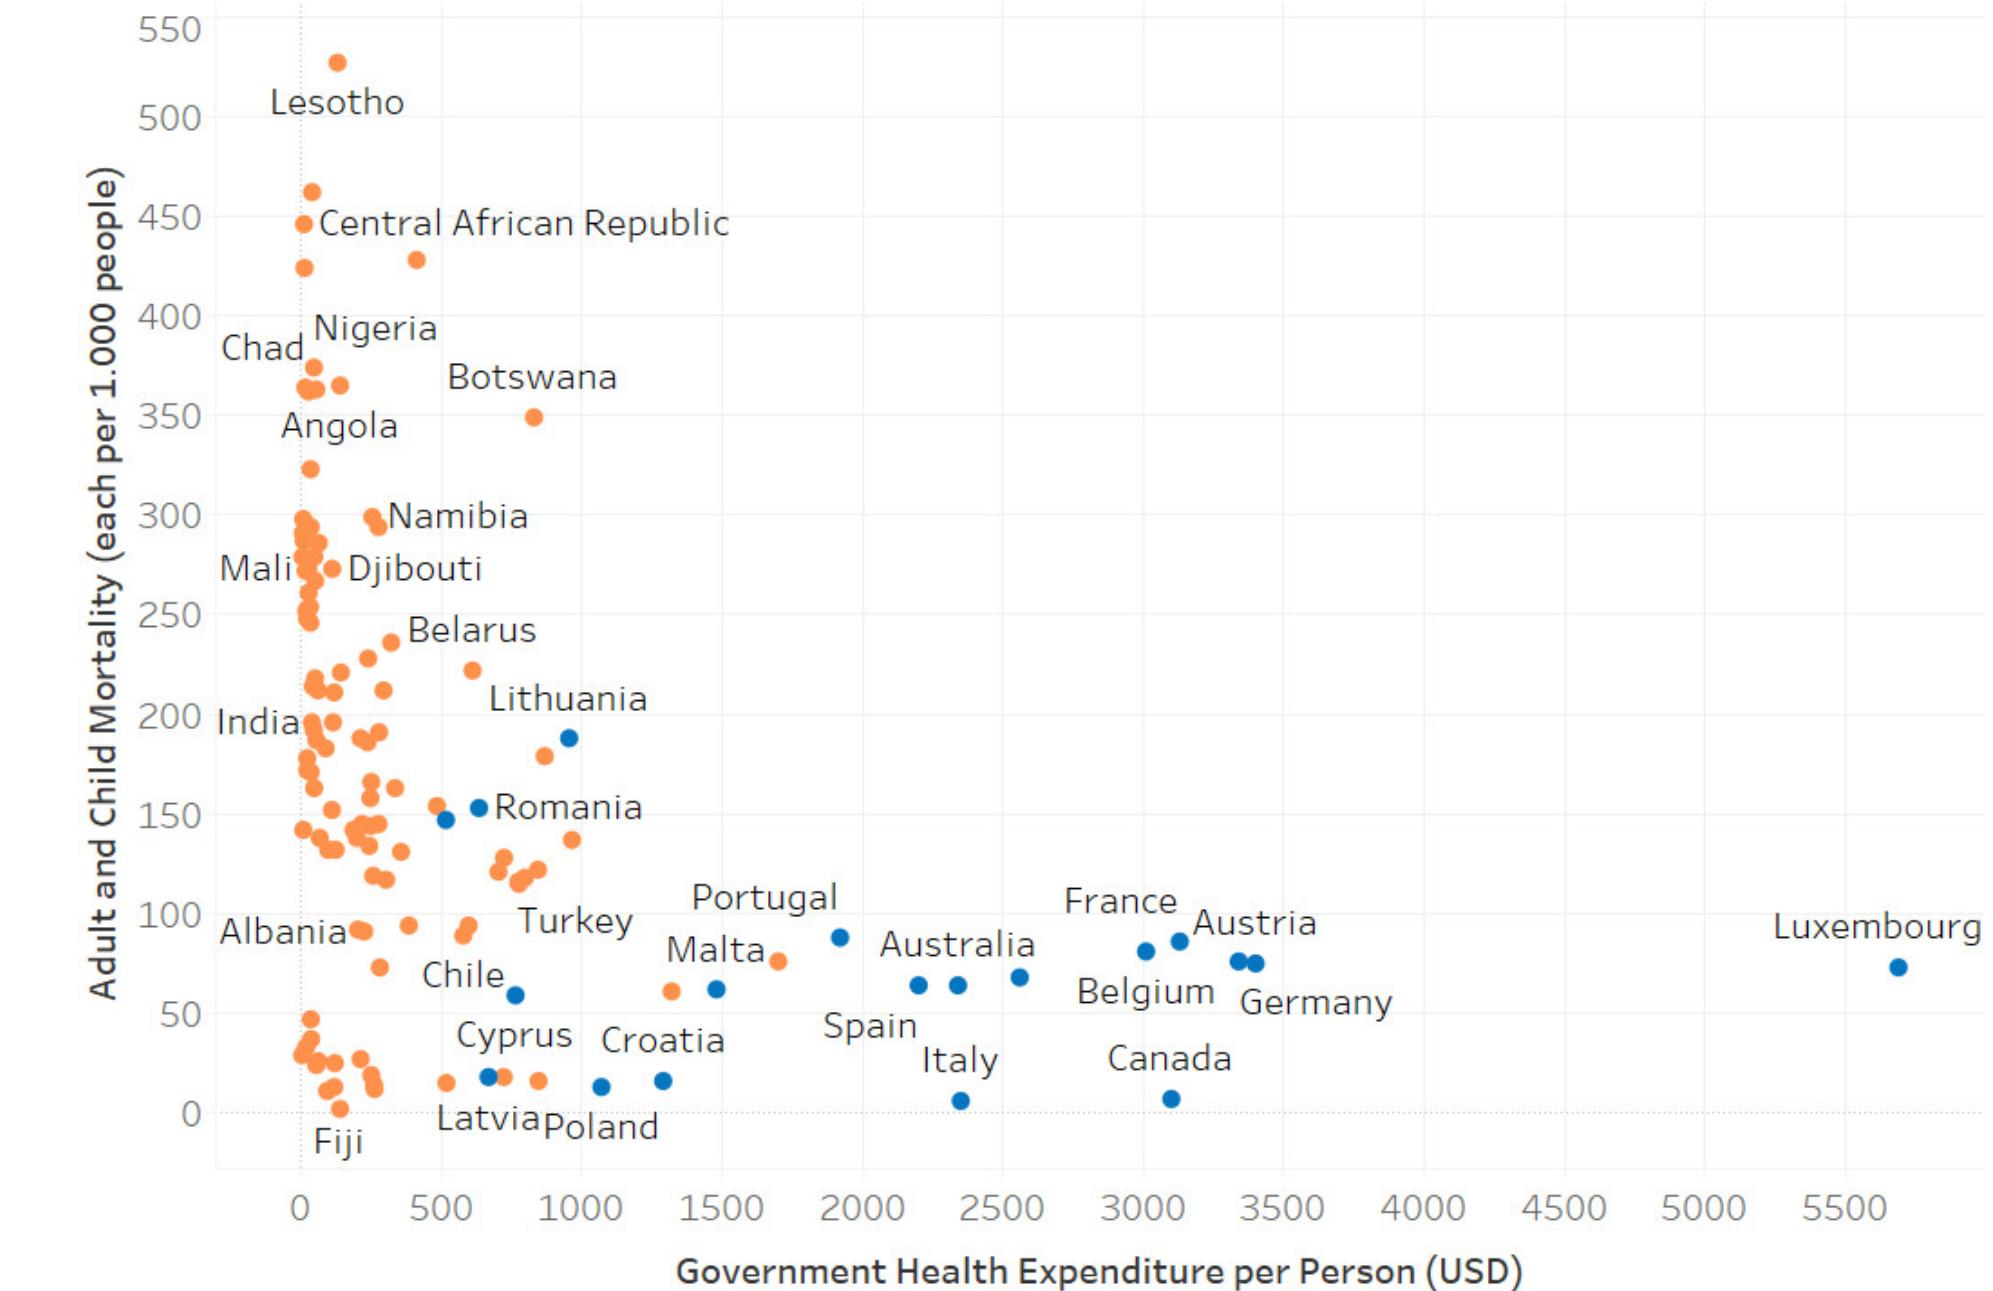

GLOBAL HEALTH INDICATORS

Mortality Rate

Mortality Rate: deaths per 1000 births.

Health expenditure is **highly correlated** with mortality rate.

Life Expectancy

In theory

\$500
per person
increases

1 year
in life
expectancy

Life Expectancy

In theory

\$500
per person
increases

1 year
in life
expectancy

However, some countries with the same expenditure

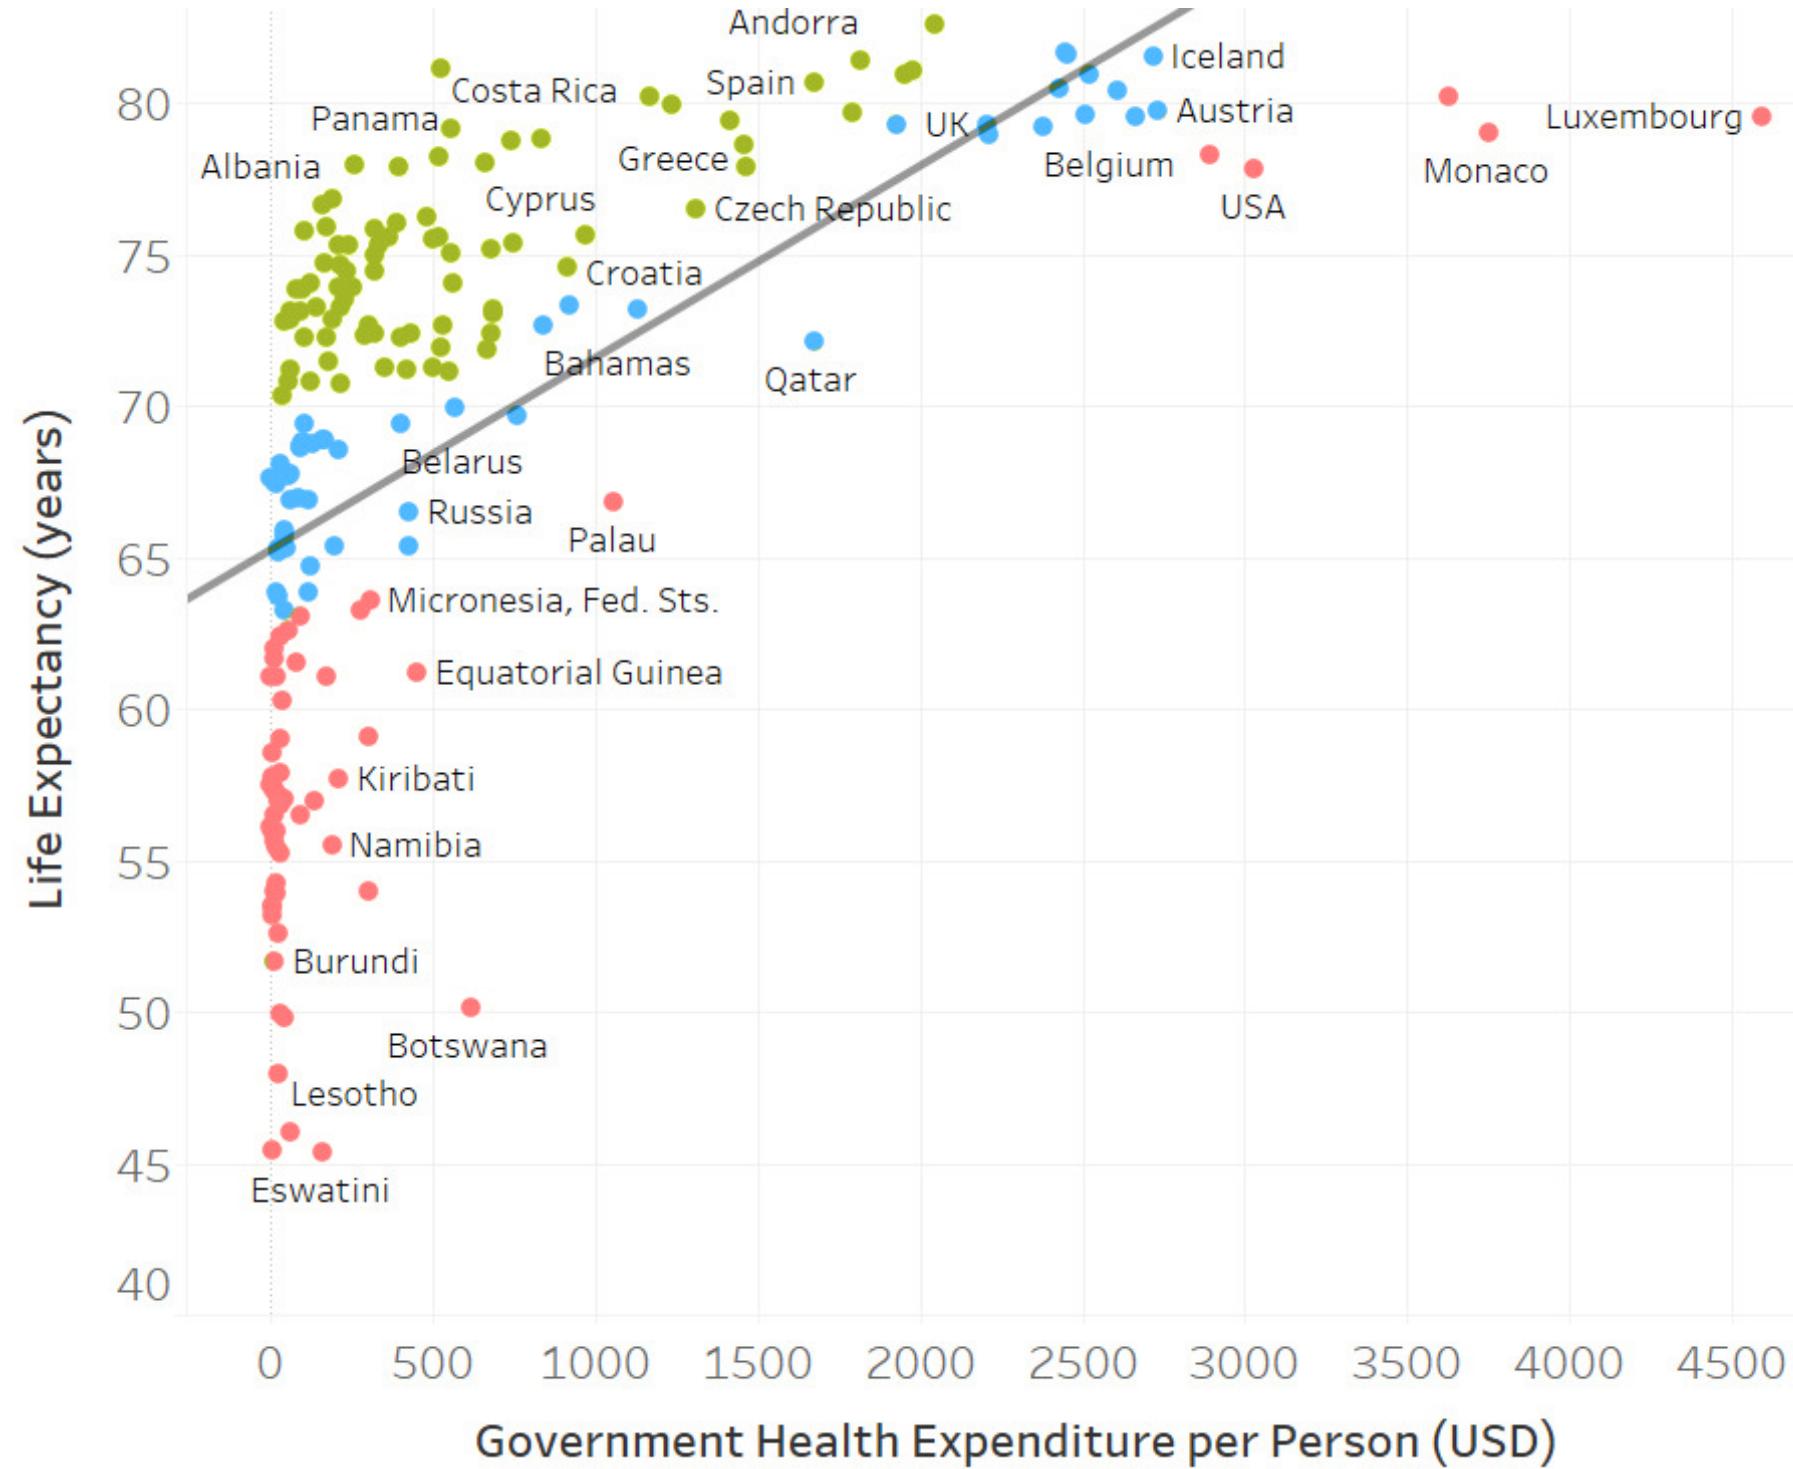

\$1.6K
per person

 81 years
life
expectancy

\$1.6K
per person

 72 years
life
expectancy

Life Expectancy

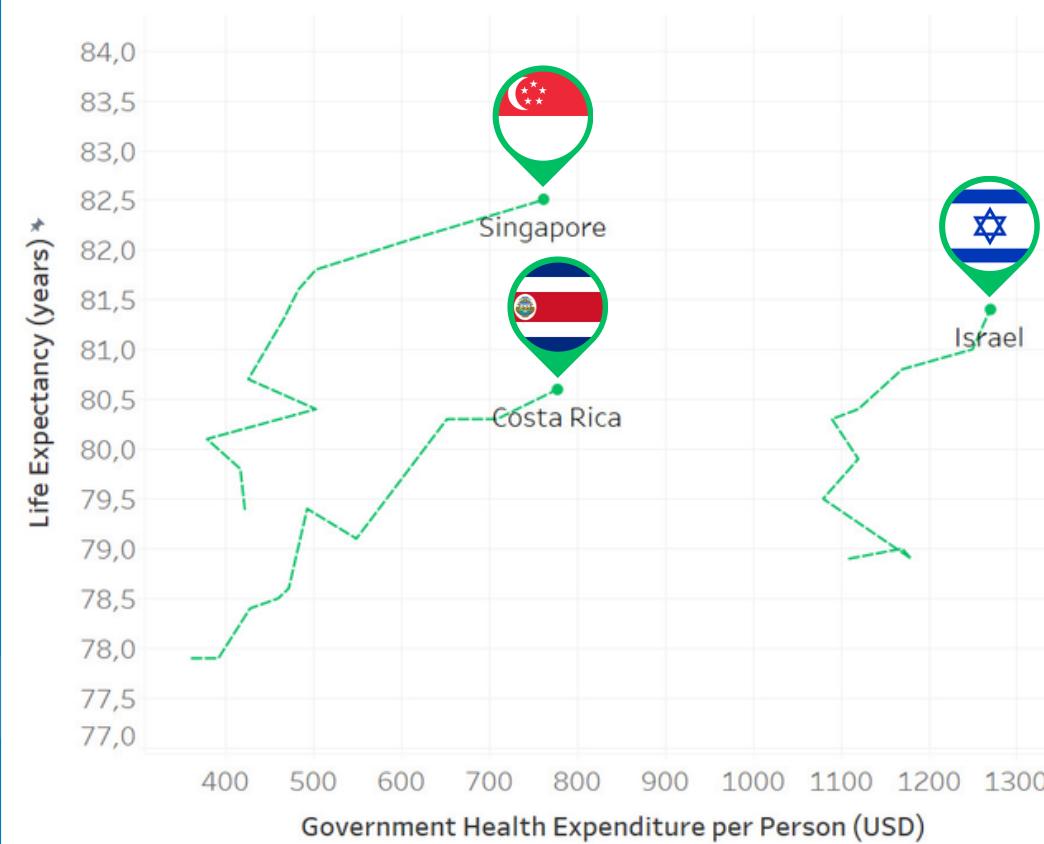

There are countries
that perform very
well, others have the
expected result,
lastly, others are
misusing their
resources

Effective Health Expenditure

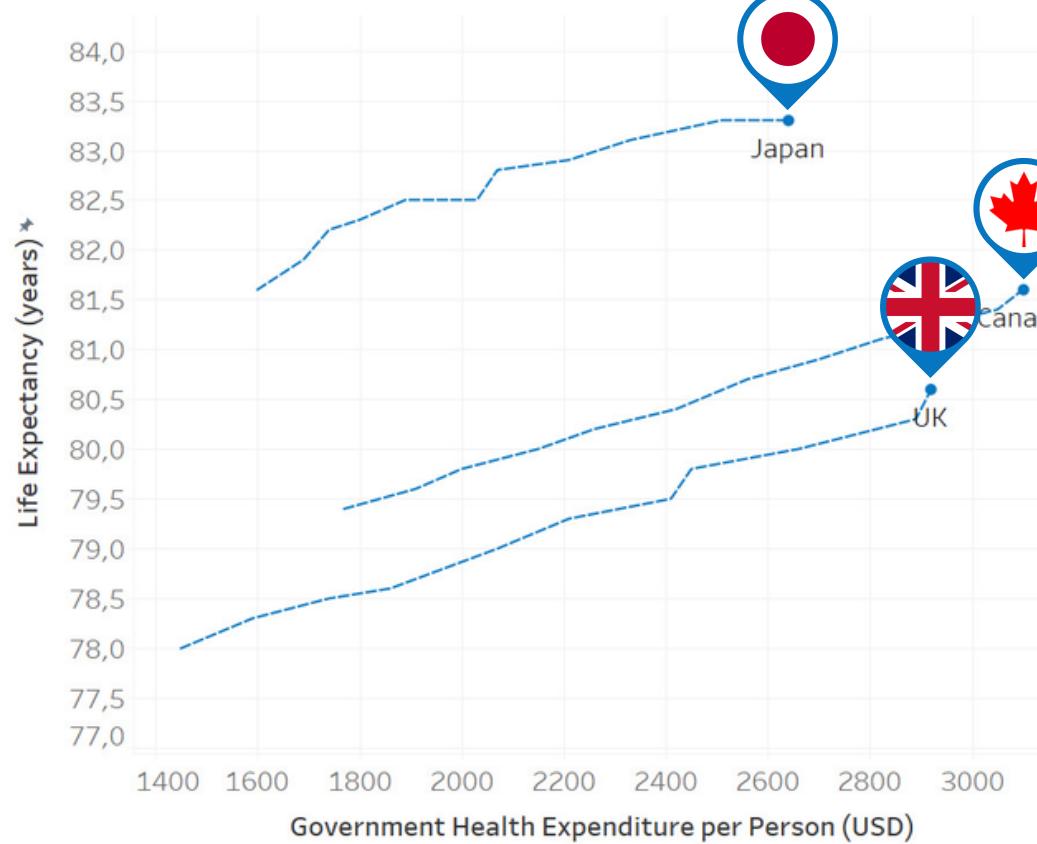

Examples of
best use

Effective Health Expenditure

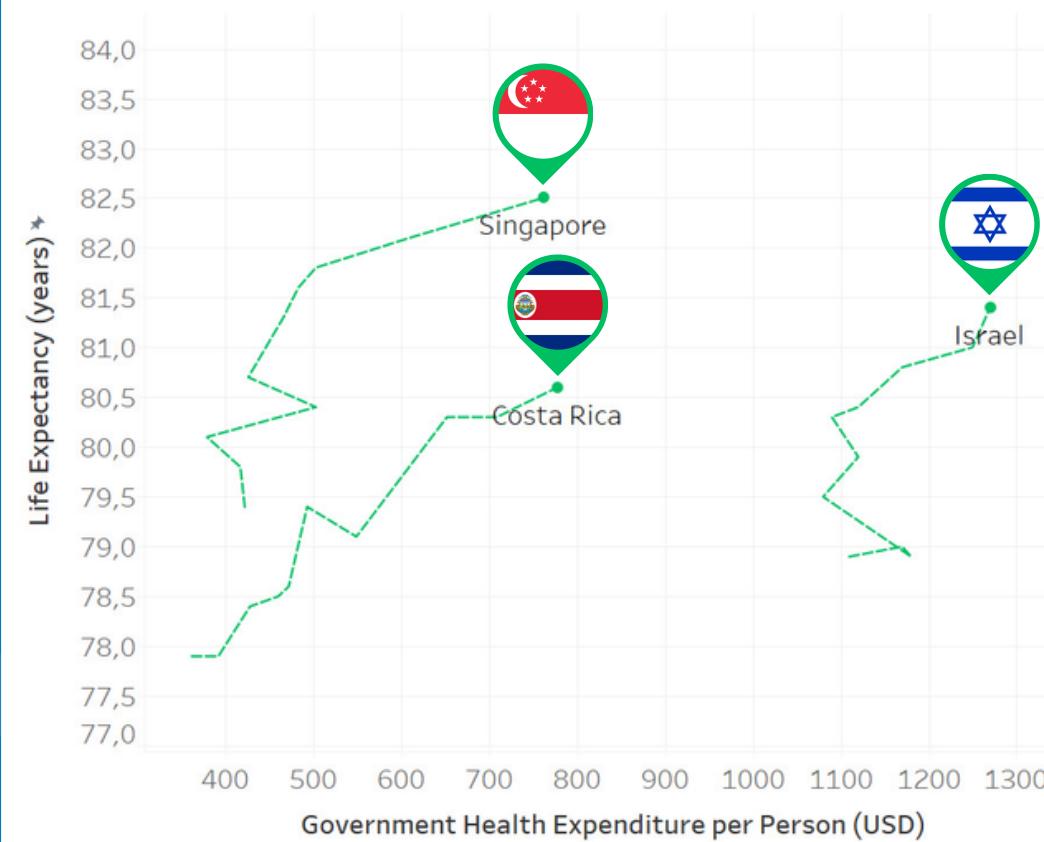

Examples of
best use

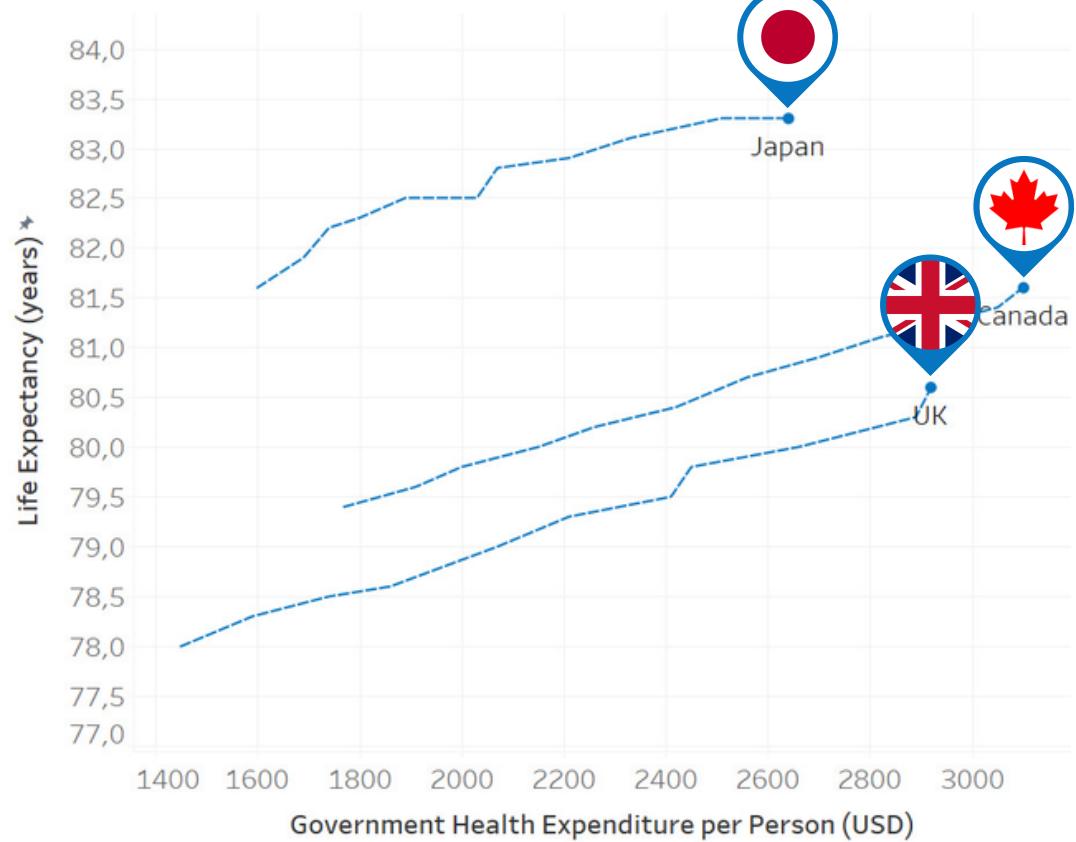

Examples of
average use

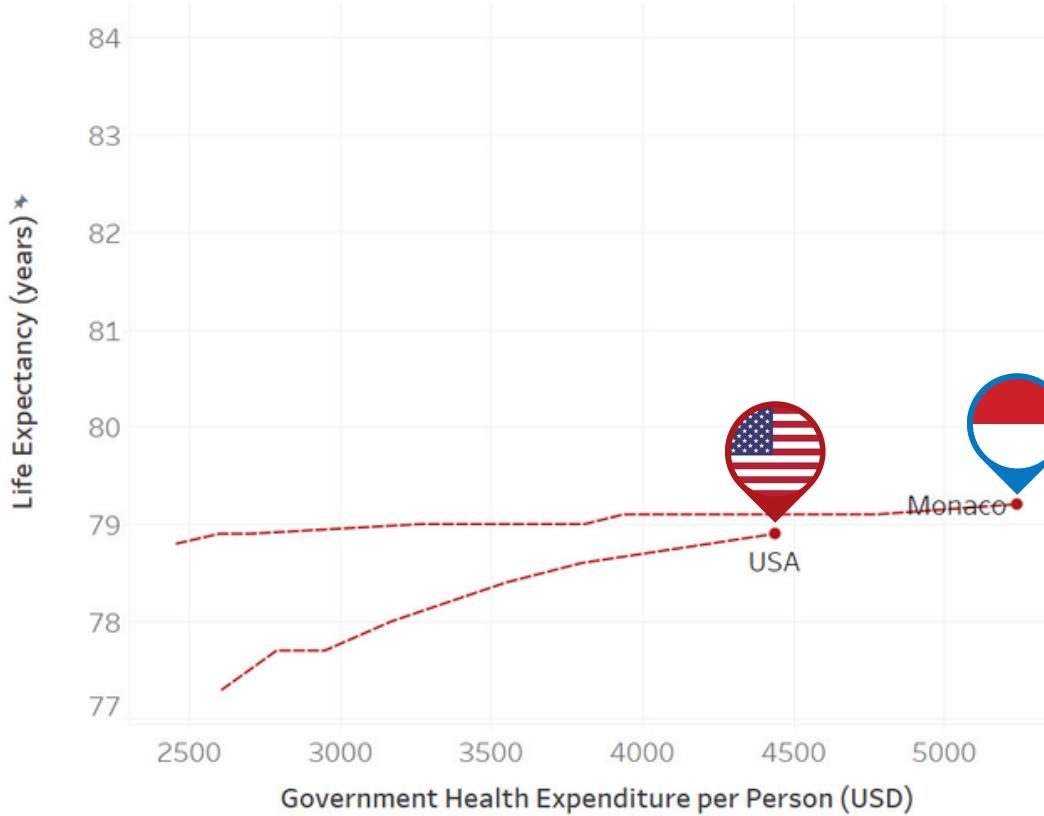

Effective Health Expenditure

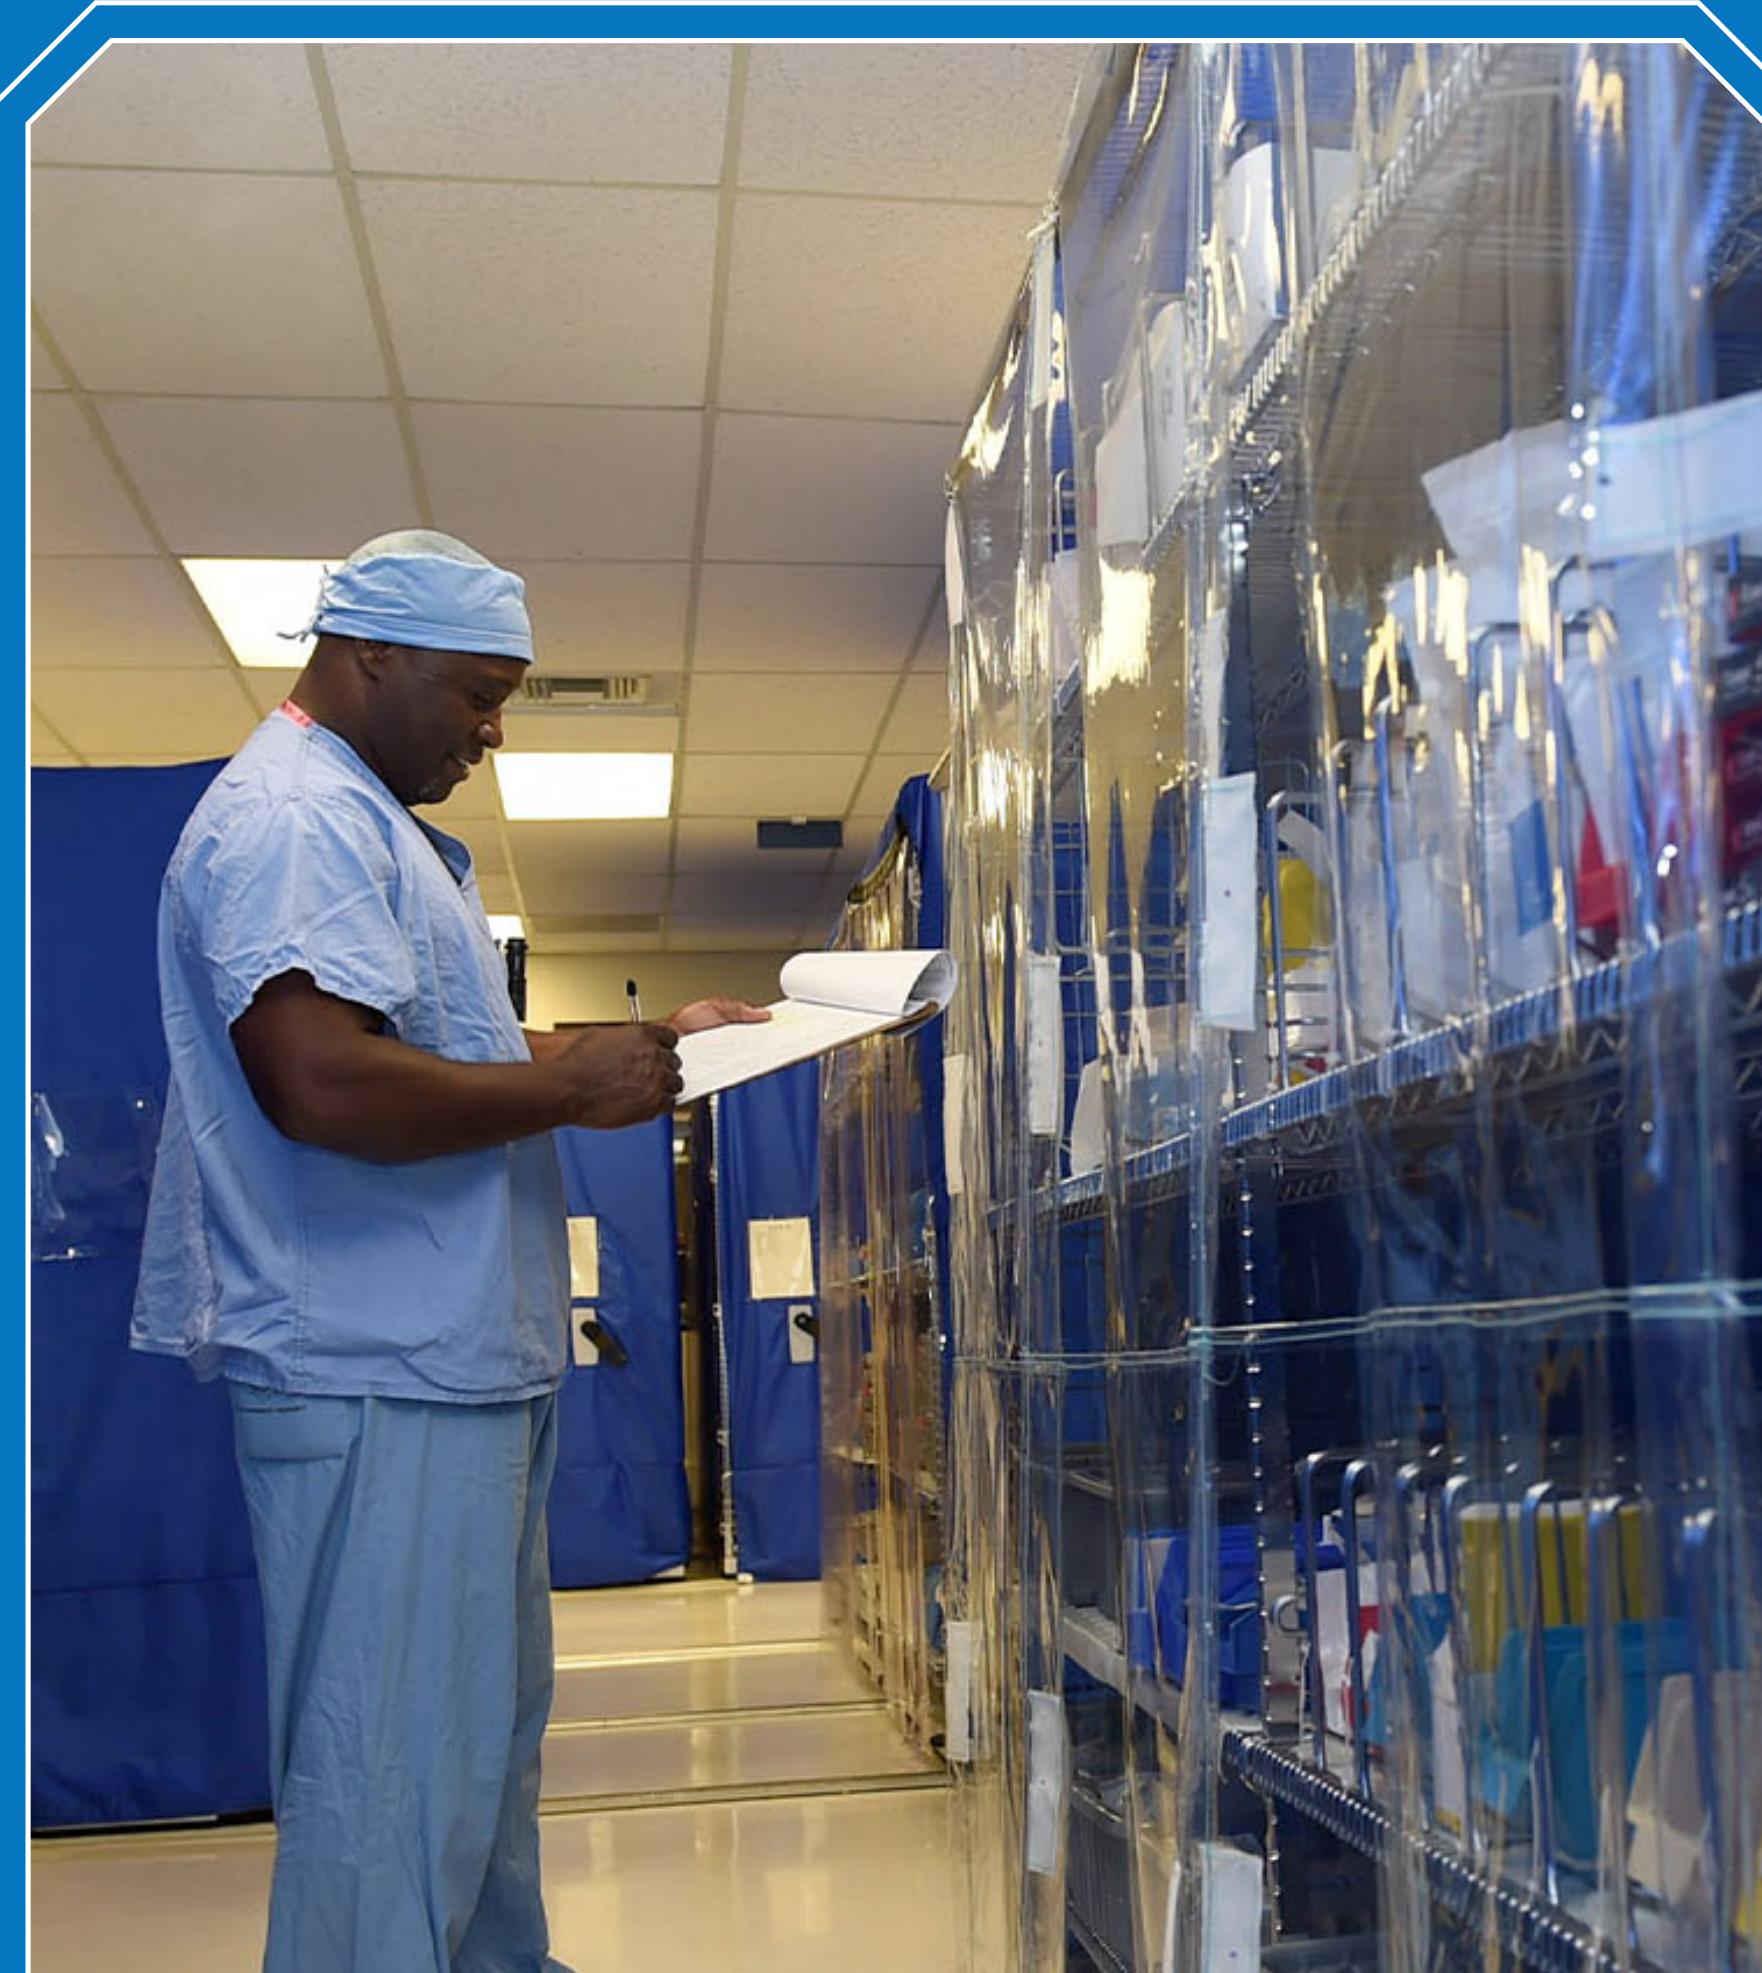

Examples of
best use

Examples of
average use

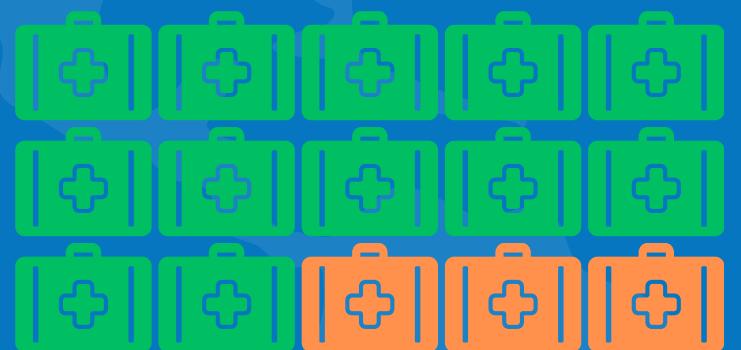

Examples of
worst use

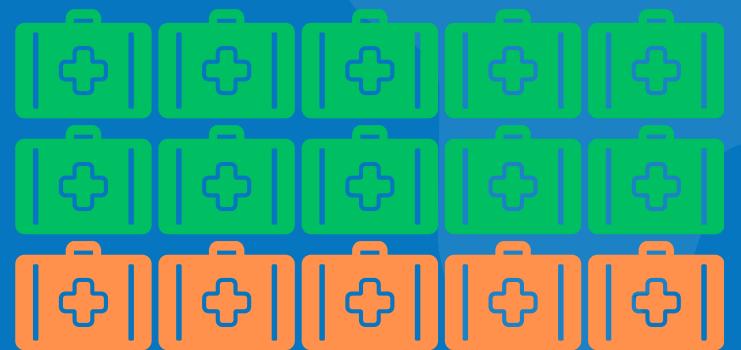

**LET'S RAISE
AWARENESS**

How big of a problem is it?

In average, countries are misusing a **fifth** of their health expenditure.

At **worst** misusing over a **third** of their health resources

LET'S RAISE AWARENESS

Spending is important too

It is also important to **spend money in healthcare** as much as it is to do it **efficiently**.

What can we do?

Track where the resources are going

Some of the misuse may be due to **bureaucracy** or **corruption**

Attend rallies that push for changes

Pressuring governments and politicians to change the structures

Raise awareness among relatives

Talk about these problems with **relatives** and **friends**

FOR A BETTER AND EFFICIENT HEALTHCARE
